A bed bug crawling on your children's clothes when away from home does not speak well of that home, but instead gives to your friends a lasting impression of neglect and carelessness in that home and is often whispered around among other friends of the family. Such unpleasant comment could have been avoided if you had used Cyrus Presto Killer for Bedbugs. The cost is only 25 cents and would have effectually cleaned the bed.

## STATEMENT OF THE PRESIDENT

Tariff Bill Not Complete Compliance With Promise Made, But Earnest Effort Downward.

TAFT SIGNS AND MAKES IT LAW

Washington, Aug. 6.—President Taft has given out a statement embodying his views of the new tariff act which he signed last yesterday afternoon and which he designates officially as the "Payne bill," in accordance with the past custom of giving first recognition to the framers of the measure in the House.

The President says that though the bill is not perfect by any means, nor "a complete compliance with promises made, strictly interpreted," it is nevertheless a sincere effort on the part of the party to make a downward revision and to comply with the promises of the platform. The statement, in full, follows:

"I have signed the Payne tariff bill because I believe it to be the result of a sincere effort on the part of the Republican party to make a downward revision, and to comply with the promises of the platform. They have been generally understood and as I interpreted them in the campaign, before election.

"The bill is not a perfect tariff bill or a complete compliance with the promises made, strictly interpreted, but a fulfillment free from criticism in respect to a subject matter involving many schedules and thousands of articles could not be expected. I believe it to be a tariff bill which will result in a reduction of excessive rates.

"This is not a free trade bill. It was not intended to be. The Republican party did not promise to make a free trade bill. It promised to make the rates protective, but to reduce them when they exceeded the difference between the cost of production abroad and here, making allowance for the greater normal profit on active investments here. I believe that while this excess has not been reduced in a number of cases, in a great majority the rates are such as are necessary to protect American industries, but are low enough, in case of abnormal increase of demand, and raising of prices, to permit the ability of the importation of the foreign article and thus to prevent excessive prices.

"The power granted to the executive under the maximum and minimum clause may be exercised to secure the removal of obstacles which have been interpreted as tariff enactments in the way of undue and unfair discrimination against American merchandise and products.

"The Philippine tariff, section, I have struggled to secure for ten years last past, and it gratifies me exceedingly by my signature to give it the effect of law. I am sure it will greatly increase the trade between the two countries, and it will do much to build up the Philippines in a healthful prosperity.

"The administration clauses of the bill and the customs court are admirably adapted to secure a more expeditious and a more speedy final construction of the meaning of the law.

"The authority to the President to use agents to assist him in the application of the maximum and minimum sections of the statute, and to enable officials to administer the law, gives a wide latitude for the application, under circumstances favorable to its truth, of information in respect to the price and cost of production of goods at home and abroad, which will throw much light on the operation of the present tariff and be of primary importance in the official collection of data upon which future executive action and executive recommendations may be based.

"The corporation tax is a just and equitable excise measure, which it is hoped will produce a sufficient amount to prevent a deficit and which incidentally will secure valuable statistics and information concerning the many corporations of the country and will constitute an important step toward that degree of publicity and regulation which the tendency in corporate enterprises in the last twenty years has shown to be necessary."

## WHY MRS. STETSON WAS ORIGINATED BY CHRISTIAN SCIENTISTS.

(Special from United Press.) Boston, Aug. 6.—Speaking for the Christian Science Church and Mrs. Mary G. Eddy, Alfred Farlow today said Mrs. Eddy had many of the symptoms of hay fever, and a doctor's prescription did not reach his case, and I took several medicines which seemed only to aggravate it. Fortunately I insisted upon having Foley's Honey and Tar. It quickly cured me. My wife has since used Foley's Honey and Tar with the same success. F. B. Briff, local agent. "135
